

HTML global attribute

The global attributes are attributes that can be used with all HTML elements.

Ye saare **Global Attributes** hain, matlab aap inhe kisi bhi HTML tag (jaise `<div>`, `<p>`, `<h1>`) par use kar sakte ho.

Attribute	Code Example	Kaam Kya Karega?
accesskey	<code><button accesskey="s">Save</button></code>	<code>Alt + S</code> dabate hi Save button click ho jayega.
class	<code><div class="card">...</div></code>	Is element par <code>.card</code> wali CSS apply ho jayegi.
contenteditable	<code><p contenteditable="true">Edit me!</p></code>	User is text ko browser mein hi change kar payega.
data-*	<code><div data-patient-id="45">...</div></code>	JS ke liye custom data store karega (Hospital project mein kaam ayega).
dir	<code><p dir="rtl">م&لـ</p></code>	Text ko right side se likhna shuru karega.
draggable	<code></code>	Aap is image ko mouse se pakad kar hila sakte hain.

enterkeyhint	<code><input enterkeyhint="search"></code>	Mobile keyboard par 'Enter' ki jagah 'Search' likha ayega.
hidden	<code><p hidden>Ye nahi dikhega</p></code>	Ye paragraph page par nazar nahi ayega.
id	<code><section id="navbar">...</section></code>	Is element ki poore page mein ek unique identity hogi.
inert	<code><div inert>Non-clickable area</div></code>	Is div ke andar kuch bhi click ya select nahi hoga.
inputmode	<code><input inputmode="numeric"></code>	Mobile par direct number wala keypad open karega.
lang	<code><html lang="hi">...</html></code>	Batayega ki page ki main language Hindi hai.
popover	<code><div id="my-pop" popover>Hello!</div></code>	Ek popup box ki tarah kaam karega.
spellcheck	<code><textarea spellcheck="true"></textarea></code>	Galat spelling par red line dikhayega.
style	<code><h1 style="color: blue;">Title</h1></code>	Inline CSS se text ka color blue kar dega.
tabindex	<code><button tabindex="1">First</button></code>	Tab key dabane par sabse pehle ye button select hoga.
title	<code>Dr. Ashu</code>	Mouse hover karne par "Doctor Info" likha ayega.
translate	<code><p translate="no">Google</p></code>	Browser ko mana karega ki "Google" word ko translate na kare.
